

SDLC
Task-1

Name - Puspanjali Tarai
Regd. no - 2141020006

Objective - create a simple use case diagram for a library management system.

Library management system is a software that helps manage the daily activities in a library, like issuing books and managing members.

There are two main actors:

- Librarian - manages book checkout
- Member - borrows and returns book

Main cases include -

- checkout book - done by both librarian and member
- Return book: performed by member.
